

2024  
International Visual  
Immersion and Design  
Exhibition.

*"Technology is not sustainable, what will continue to change for good are ideas"*

**International Visual Communication for Collaboration**

**DIGITAL & HUMANS**

**2024 International Visual Immersion & Design Exhibition**

Bismillah,

The theme "Digital & Humans" is presented to reflect the intersection of two worlds—the human world full of emotions, intuition, and physical experiences, and the rapidly evolving digital world with algorithms, artificial intelligence, and unlimited visualizations. By showcasing the work of designers who are actively contributing to positive change, "Digital & Humans" aims to inspire individuals from diverse backgrounds to recognize their own potential as agents of change. The exhibition encourages viewers to consider how they can incorporate design thinking and principles into their own lives, careers, and decision-making processes, ultimately fostering a collective effort towards a more sustainable and world changing future.

Through design work, let us reflect on the role of humans in the digital ecosystem?  
Is technology a complement to human creative exploration or a new challenge to our identity?

Enjoy the exhibition.  
Warm regards, Noor Udin Ung!

Hajime Tsushima  
ENTANGLED ESSENCE, Japan

ENTANGLED ESSENCE

The intertwining snake-like form suggests a quantum-like, inseparable connection, brought to life through a monochrome, abstract design. This poster symbolizes the fusion of AI and humanity. The kanji "人" replaces the "A" in "AI," highlighting the bond between artificial intelligence and people.

# Occupied or die

The shadows of tyranny stretch across the land, suffocating  
 a hope that threatens to extinguish the flickering embers of  
 hope. In this bleak era, where freedom is a fleeting dream and  
 resistance a perilous path, the choice is stark: submit to the  
 yoke of oppression or rise against the darkness.
